Your multiple requests are broad and time consuming and we are not going to add to the time already incurred by counting pages and adding data from a voluminous number of emails. Our best estimate is that there are at least 1000 printed pages.

If you want copies of the redacted and printed to take with you we would need payment in the amount of \$150. Upon receipt, we will start copying and if there is more than \$150 owed we will let you know. If there is for some reason less, we will provide a refund. For this particular email request we could waive the fee for staff time, however with other requests we will need to charge the staff time to copy documents at the prorated \$10.50 per hour.

As you have been informed multiple times, you always have the option of coming into the office and inspecting the printed/redacted emails on a mutually agreeable date and time; provide a few proposed dates and times, and we will have a male available to sit with us while you review the printed (redacted) documents.

As far as the emails that do not require redaction that are to be provided electronically, we already incurred the cost of purchasing flash drives for you, which you have not reimbursed. Once you have paid for the number required to hold the data, (estimate 1 to 2) we will arrange to have the "native format" documents copied onto them. We can also cover the cost of mailing this one time or you may come pick it up.

We need a decision about how you want to handle the voluminous documents that you have requested.

Hi Blair,

If in fact you have finished collecting the material responsive to these three requests can you please tell me how much electronic data there is and how many paper pages there are?
